USDC Technology Launches Edge Data Center Solution - "CloudBox"

-- The cutting edge Mini Data Center to provide computing infrastructure from installation to operation --

Ho Chi Minh, December 24, 2021 — Universal Smart Data Center (USDC) Technology, the professional and leading company in technology construction for data center services in Vietnam, today excited to announce our "CloudBox" - a "Cloud-in-a-Box" Edge Computing Solution. The CloudBox provides an all-in-one solution covering all items from installation to operation and maintenance for a functioning Mini Data Center. As a result, our customers can quickly deploy an edge computing platform and an onsite IT infrastructure simply and efficiently. By adding CloudBox to existing modular series, USDC Technology expands its lineup to meet any need for an edge platform, and provide appropriate data center services and solutions according the customers' needs.

CloudBox comes equipped with Rack, UPS, cooling unit, access control, monitoring that function as a data center. In addition, it has waterproof & dustproof option which can be deployed close to the devices. CloudBox is suitable for small on-premise server room at customer sites where require low latency, real-time performance, processing of big data, or a high level of security.

Scalability

Function in a modular compact box.
Easy to start small quickly and expand on demand

Cost Efficiency

Low PUE, low installation and operation cost which lead to a lower CTO

Easy Operation

Plug-and-play installation, centrally operated and maintenance remotely

With Digital Transformation and 5G/IoT, the users are putting computing resources in suitable locations. Edge computing becomes more important as well as the cloud. CloudBox is not only for a server room but also a platform for distributed cloud, local 5G, and IoT/AI/Big Data.

About USDC Technology

USDC Technology is a professional and leading company in technology construction for Data Center services in Vietnam and the region. At USDC, nothing is of greater importance to us than keeping your applications online and your data secure.
